Summary

Innovative and detail-oriented Front End Developer, excelling in UI design through expert proficiency in HTML, JavaScript, and CSS. Adept in collaborative development, API integration, and code troubleshooting.

Experience

Freelancer
Front-End Developer | 05/2023 - Present

- Spearheaded UI development for multiple eCommerce sites using HTML, JavaScript, and CSS, driving a 10% surge in organic site visits and a 20% increase in average shopping cart value.
- Collaborated seamlessly with back-end developers and designers to seamlessly integrate web services and third-party APIs, contributing to the creation of mobile-friendly, responsive websites.
- Demonstrated proficiency in writing and troubleshooting JavaScript, HTML, and CSS code for two web-based applications, resulting in enhanced usability and an elevated user experience across both projects.

Wipro | Gurguram, Haryana
Software Engineer | 02/2022 - 04/2023

- Engineered, developed, and sustained client websites within a dynamic 3-member team, employing HTML, CSS, and JavaScript to deliver innovative solutions.
- Executed meticulous manual sweep testing protocols, ensuring the highest standards of website functionality and user experience.
- Crafted accessible, non-technical operation and workflow descriptions, facilitating seamless collaboration with non-coding teams and minimizing operational interruptions.

PDM University | B.garh, Haryana
Front End Dev Intern | 01/2021 - 12/2021

- Elevated aesthetics of university's website using HTML, CSS, and JavaScript for an engaging user interface.
- Integrated web services and APIs in collaboration with design and backend teams for responsive websites.
- Identified and resolved coding issues in web applications, enhancing overall usability.

Skills

Critical Thinking, Communication, Adaptability, HTML, CSS, Bootstrap, JQuery, JavaScript, UI/UX

Sarvodaya Bal Vidhyalaya | New Delhi
12th/10th | 04/2017

Projects

Spotify Clone - https://anikxxt.github.io/Spotify-Clone/

- Successfully conceptualized and executed a Spotify clone, showcasing expertise in HTML, CSS, and JavaScript.
- Meticulously structured the application's content and layout using HTML, while skillfully mimicking Spotify's aesthetic through CSS styling.
- Implemented robust functionality for music playback with JavaScript, resulting in a project that mirrors Spotify's design and user interface.
